

KARTIK MISHRA

WEB DEVELOPER

PROJECTS

NimbusBook (Cloud notes making web app)

NimbusBook is a cloud-based notes application built with the MERN stack. It features user authentication, allowing users to securely manage their notes. Users can create, update, and delete notes with ease.

Plate Pages (Food recipe web app)

Plate Pages is a food recipes application built with React.js. It enables users to discover random recipes and search for their favorites. The app features a clean, responsive UI for an engaging user experience

FXRateMaster (Currency converter web app)

FXRateMaster is a currency converter app that allows users to easily convert amounts between different currencies. It provides real-time exchange rates and a user-friendly interface for seamless currency conversion.
